-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Applicant's amendment and arguments of August 8, 2005 are acknowledged and entered.
2. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

4. Claims 1, 4, 5, 10, and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Tokunaga.

Tokunaga shows a piece of jewelry adapted to receive a quantity of a fragrance producing composition that includes a fragrance emitting substance in a carrier liquid comprising a securement member 14 adapted to releasably secure to a portion of one's body or clothing, a setting 16 supported by the securement member, and a piece of porous material 10 having sufficient porosity to permit penetration thereof by the carrier liquid and the fragrance emitting substance and including a top surface and a bottom surface opposite the top surface, the piece affixed to the setting at an orientation relative the securement member such that ambient air can flow about at least a portion of both the top and the bottom surfaces wherein the setting is a bezel as recited in claim

4. Regarding claim 31, since Tokunaga shows all of the structural limitations of the device of the instant invention, the method as recited would have been obvious to one

Art Unit: 3752

having ordinary skill in the art in order to reuse the device with a different type of fragrance.

Claim Rejections - 35 USC § 103

5. Claims 6 and 35-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tokunaga.

The piece of porous material being a sphere is an obvious matter of design choice since such a modification would have involved a mere change in the shape of a component which is generally recognized as being within the level of ordinary skill in the art. The method steps recited in claims 35-37 are obvious matters of user preferences.

6. Claims 7, 8, 32, and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tokunaga in view of Muhmel et al. (DE 197 53 956).

Muhmel et al. teach a scent cartridge comprising ceramic which contains sintered aluminum oxide. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Smith by replacing the porous material with a porous material containing sintered aluminum oxide as taught by Muhmel et al. since Muhmel et al. teaches that such arrangements provide for an inexpensive and easily manufactured device.

Allowable Subject Matter

7. Claims 2, 3, 11, 22, and 34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 12-30, 38, and 39 are allowed.

Art Unit: 3752
